The new range of tools aim to enhance safety, productivity, and precision across industries

**Bengaluru, India** – Bosch Limited, a leading global supplier of technology and services announces the launch of its latest Hand Tools for professionals and artisans, along with advanced Industrial Tools designed to simplify assembly line operations. The new offerings are engineered to enhance efficiency, precision, and user experience for industrial and professional applications.

“At Bosch, we are dedicated to empowering professionals and artisans with tools that provide exceptional performance, durability, and safety. We are expanding our range of hand tools, designed with exceptional user ergonomics to meet the demands of high-voltage environments and heavy-duty applications, ensuring long-lasting performance. We are also launching our new line of industrial tools, designed to streamline assembly line operations in industries like automotive manufacturing and heavy engineering, offering innovative features.” said Nishant Sinha, Regional President, India & SAARC, Power Tools Division at Bosch India.

### **Simplifying Life at Work:**

Bosch is entering the hand tool market with a carefully curated portfolio designed to meet the needs of artisans, craftsmen, professionals, and home users. The initial range includes over 100 products, including pliers, screwdrivers, ratchet sets, wrenches, hammers, saws, knives, spirit levels, and more, with plans for continued expansion into additional categories. In parallel, the VDE Hand Tools range, certified for safe use up to 1,000V includes high-performance pliers for gripping, cutting, and bending wires, ergonomic screwdrivers designed for intricate electrical applications and durable hammers with increased user protection features, that reduce user fatigue and improve task accuracy. Professionals in power distribution, industrial maintenance, and high-voltage installations stand to benefit from this robust range.

### **Engineered for the Assembly Line:**

Bosch's newly launched Industrial Tools or I-Series Tools are meant to simplify assembly line operations, offering cutting-edge features for superior precision and efficiency. Equipped with torque presetting capabilities, the tools ensure accurate and consistent fastening, reducing human errors and leading to improved product quality. Additionally, the integration of NFC-based HMI locks prevent unauthorized setting changes, maintaining system integrity and ensuring safer operations on the production floor. By eliminating the traditional two-step tightening process, these new tools streamline industrial assembly, minimize downtime, and provide up to five times longer tool life, making them ideal for industries such as automotive manufacturing, electronics assembly, and heavy engineering.

Bosch's focus on integrating advanced safety technologies reaffirms its commitment to creating an environment where professionals and enthusiasts can work smarter and more confidently. By ensuring superior tool reliability and consistent performance, Bosch continues to empower users to achieve greater efficiency without compromising on safety.

*The Bosch Group is a leading global supplier of technology and services. It employs roughly 417,900 associates worldwide (as of December 31, 2024). According to preliminary figures, the company generated sales of 90.5 billion euros in 2024. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in*

*sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is “Invented for life,” Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 470 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch’s global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch’s innovative strength is key to the company’s further development. At 136 locations across the globe, Bosch employs some 86,900 associates in research and development, of which nearly 48,000 are software engineers.*

*The company was set up in Stuttgart in 1886 by Robert Bosch (1861–1942) as “Workshop for Precision Mechanics and Electrical Engineering.” The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a charitable foundation. The remaining shares are held by Robert Bosch GmbH and by a corporation owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG. It is entrusted with the task of safeguarding the company’s long-term existence and in particular its financial independence – in line with the mission handed down in the will of the company’s founder, Robert Bosch.*
