- ▶ Total revenue from operations in Q3 of FY 2025–26 is up by 9.4% over the same quarter of previous year.
- ▶ Profit after tax stood at 10.9% of total revenue from operations.

Bengaluru, India – Bosch Limited, a leading supplier of technology and services, today posted its total revenue from operations of INR 4,886 crores (471 million euros) in Quarter 3 of FY 2025–26, an increase of 9.4% over the same quarter of last year. This growth is driven by higher demand in passenger cars and off-highway segment.

In the quarter Oct-Dec 2025, the company has done a preliminary assessment of the financial implications due to changes in labour code and has included the same under employee benefits expense.

After considering the impact of changes in labour code, the Profit Before Tax (before exceptional items) for the quarter Oct-Dec 2025 stood at INR 709 crores (68 million euros) which is 14.5% of the total revenue from operations, an increase of 6.7% over the same quarter of previous year. The improvement is mainly on account of favourable product mix and optimization of expenses.

The Profit After Tax stood at INR 532 crores (51 million euros) which is 10.9% of revenue from operations.

“Our business development reflects strong sales growth across key components in passenger cars and off-highway segments, in line with the overall growth in the automotive sector. This performance highlights our strategic focus on market leadership and operational efficiency, despite supply chain issues in the quarter.” said Guruprasad Mudlapur, President of the Bosch Group in India, and Managing Director, Bosch Limited.

Snapshot of performance in Quarter 3

Overall product sales of the automotive segment have increased by 18.5% compared to the same quarter of the previous year. The Power Solutions business grew by 19.5% mainly on account of growth in passenger cars and off-highway segments.

Two-wheeler business grew by 58.3%, mainly on account of higher sale of exhaust gas sensors due to ramp up for OBDII norms implementation from April 1, 2025.

Mobility aftermarket business grew by 5.3% on account of GST reforms, strong growth in OE segment, and growth across key product groups of Diesel, Wipers and Braking systems.

The Beyond Mobility business declined by 23.3% in net sales over the same quarter of the previous financial year, mainly due to the sale of "Video solutions, Access and Intrusions and Communication systems" business in May 2025.

"Looking ahead, we anticipate continued positive momentum in the automotive sector and remain optimistic of businesses delivering well in the next quarter. As an organization, we will continue to focus on leveraging a favorable product mix and advancing future-ready technologies to drive growth amid an evolving market and capitalize on increased consumer demand." adds Mudlapur.

The Bosch Group is a leading global supplier of technology and services. It employs roughly 412,000 associates worldwide (as of December 31, 2025). According to preliminary figures, the company generated sales of 91 billion euros in 2025. Its operations are divided into four business sectors: Mobility, Industrial Technology, Consumer Goods, and Energy and Building Technology. With its business activities, the company aims to use technology to help shape universal trends such as automation, electrification, digitalization, connectivity, and an orientation to sustainability. In this context, Bosch's broad diversification across regions and industries strengthens its innovativeness and robustness. Bosch uses its proven expertise in sensor technology, software, and services to offer customers cross-domain solutions from a single source. It also applies its expertise in connectivity and artificial intelligence in order to develop and manufacture user-friendly, sustainable products. With technology that is "Invented for life," Bosch wants to help improve quality of life and conserve natural resources. The Bosch Group comprises Robert Bosch GmbH and its roughly 490 subsidiary and regional companies in over 60 countries. Including sales and service partners, Bosch's global manufacturing, engineering, and sales network covers nearly every country in the world. Bosch's innovative strength is key to the company's further development. At 136 locations across the globe, Bosch employs some 82,000 associates in research and development.

The company was set up in Stuttgart in 1886 by Robert Bosch (1861-1942) as "Workshop for Precision Mechanics and Electrical Engineering." The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future. Ninety-four percent of the share capital of Robert Bosch GmbH is held by Robert Bosch Stiftung GmbH, a limited liability company with a charitable purpose. The remaining shares are held by Robert Bosch GmbH and by a company owned by the Bosch family. The majority of voting rights are held by Robert Bosch Industrietreuhand KG. It is entrusted with the task of safeguarding the company's long-term existence and in particular its financial independence – in line with the mission handed down in the will of the company's founder, Robert Bosch.
